# STAY CONNECTED STAY SECURE

Our Voice Services use Voice over Internet Protocol (VoIP), which is the modern way of making phone calls over internet lines as opposed to older ISDN copper lines. This ensures better connectivity & call quality. It saves you time and money, allowing you to consolidate your school connectivity into one connection. By 2025 all schools will need to have switched to VoIP, as Openreach have announced they'll be switching off ISDN lines.

## PACKAGES

**Clear transparent pricing.** We believe in offering Schools & MATs the very best possible prices, and exceptional service as standard. Choose from our core packages or we can help you custom build a suitable package.

<a href="#">CALL TO ORDER</a>	<a href="#">CALL TO ORDER</a>	<a href="#">CALL TO ORDER</a>

**PRICE  
MATCH  
GUARANTEE**

All prices quoted are based on a 3 year contract with AIT. We'll match any UK quote. You can get up and running in just approximately 7 working days. Our packages come with a whole host of features, designed specifically for schools.

We've carefully selected Cisco & Yealink handsets which meet the requirements and beyond of a School environment. Cost effective, durable and reliable. All handsets are available either on lease, or upfront. Just ask our friendly team and they'll give you recommendations you can trust.

# LET'S TALK

Our VoIP phone service goes beyond the capabilities of a traditional phone system. VoIP has unparalleled features, control and call management. Through the introduction of our VoIP technology, we can provide schools and academies with significant cost savings.
